Some settings may not be available. Some lenses have indications such as on them. This is convenient when you want to focus and meter separately. • AF/AF lock, no AE lock: Press the shutter button halfway to execute AF. (You cannot take another picture.) 260 Page 2613 Custom Function Settings NC.Fn.5 High ISO speed noise reduction This function reduces the noise generated in the image. While you hold down the shutter button halfway, the camera will keep focusing on the subject continuously. The exposure is set at the moment the picture is taken. When the AF point selection (p.97) is automatic, the camera first uses the center AF point to focus. This enables you to create a vertically oriented print from a horizontal image. Image Tilt Correction By turning the dial, you can adjust the image tilt angle up to ±10 degrees in 0.5-degree increments. (The previous version will be overwritten.) Page 9310 This section explains an overview of various software applications for EOS cameras. 6.8 cm (2.7 in.) (4:3) with approx. 187 File name 30 Av (Aperture-priority AE) When you process the RAW image with the EOS software, this allows you to generate an image with the same aspect ratio that was set for shooting. You can view, edit, and print RAW and JPEG images. * Some functions differ between the version to be installed on a 64-bit computer and that to be installed on a 32-bit computer. Picture Style Editor You can edit Picture Styles, and create and save original Picture Style files. Note that the AF speed may differ between the normal and magnified views. If you magnify the view after focusing with [FlexiZone - Single] in the normal view, precise focus may not be achieved. If [u Live mode] is set, magnified view is not possible. 149 Page 150 Using AF to Focus (AF Method) Shooting Conditions that Make Focusing Difficult Low-contrast subjects such as the blue sky, solid-color flat surfaces or when highlight or shadow details are lost. Subjects in low light. Stripes and other patterns where there is contrast only in the horizontal direction. Subjects with repetitive patterns (Example: Skyscraper windows, computer keyboards, etc.). Fine lines and subject outlines. Under a light source whose brightness, color, or pattern keeps changing. Night scenes or points of light. The image flickers under fluorescent or LED lighting. Extremely small subjects. Subjects at the edge of the picture. Strongly backlit or reflective subjects (Example: Car with a highly reflective body, etc.). The AF point covers both near and distant subjects (Example: Animal in a cage, etc.). Subjects that keep moving within the AF point and cannot keep still due to camera shake or subject blur. A subject approaching or moving away from the camera. Autofocusing while the subject is very far out of focus. Soft focus effect is applied with a soft focus lens. A special effect filter is used. Noise (dots of light, banding, etc.) appears on the screen during AF. 151 Using AF to Focus (AF Method) If focus is not achieved with the shooting conditions on the preceding page, set the lens's focus mode switch to *AF* and focus manually. If you use AF with any of the following lenses, using [Quick mode] is recommended. 706 (Night Portrait) You can check horizontal or vertical tilt when shooting. 143 Page 144 Menu Function Settings Aspect ratio NT The image's aspect ratio can be set to [3:2], [4:3], [16:9], or [1:1]. The area surrounding the image area is masked in black when the following aspect ratios are set: [4:3] [16:9] [1:1]. JPEG images will be saved with the set aspect ratio. The selected aspect ratio information is added to the RAW image file. 18.0 effective megapixels, DIGIC 4+, high-precision and high-speed 9-point AF, approx. 3.0 shots/sec. In the mode, the shutter speed (1/60 sec. 4 meters / 13.1 feet. When you raise the built-in flash (p.103), the AF-assist beam will be emitted as necessary. The horizontal axis indicates the brightness level (darker on the left and darker on the right), while the vertical axis indicates how many pixels exist for each brightness level. To turn on the display, press the button. [Remains on]: Display remains on even when you press the shutter button halfway. Each ambient is a modification of the respective shooting mode's image characteristics. (2) Vivid The subject will look sharp and vivid. Purchase a new one. The number of possible shots will decrease with any of the following operations: • Pressing the shutter button halfway for a prolonged period. Activating the AF frequently without taking a picture. Using the lens's Image Stabilizer. Using the LCD monitor frequently. Continuing Live View shooting or movie shooting for a prolonged period. • Using the Wi-Fi function. • The Eye-Fi card's communication function is operating. The camera turns off by itself. Auto power off is in effect. The photo book settings may be overwritten. 254 Page 255 1 Customizing the Camera on Creative Z You can make fine adjustments to various camera functions to suit your picture-taking preferences with Custom Functions. 224, 240, 275, 313 Camera Clearing the settings to default 202 Clearing the camera settings to default 141, 164 Fine (image-recording quality) When you are not shooting, always turn off the camera. Recording and Image Quality If the attached lens has an Image Stabilizer and you set the Image Stabilizer (IS) switch to *On*, the Image Stabilizer will operate at all times even if you do not press the shutter button halfway. Good for portraits, pets, and other subjects to which you want to give a warm look. (5) Intense While the overall brightness is slightly lowered, the subject is emphasized for a more intense feeling. When you use EOS Utility (EOS software) to transfer images to a computer, the specified images will be copied into a dedicated folder. This software is aimed at advanced users who are experienced in processing images. 310 Page 311 Software Start Guide Downloading and Installing the Software Do not connect the camera to your computer before you install the software. Select the desired image-recording quality, then press *2*. Flash exposure compensation The flash exposure compensation setting screen will appear. The image's color balance will be adjusted toward the color in the direction of the move. On the right of the screen, "Shift" indicates the direction and correction amount, respectively. Pressing the button will cancel all the [WB Shift/Bkt.] settings. Press to exit the setting and return to the menu. When the white balance is corrected, will be displayed in the viewfinder and on the LCD monitor. One level of the blue/amber correction is equivalent to approx. correct. 1 then press the setting. 2 Select Check that [Correction data available] is displayed for the attached lens. If [Correction data not available] is displayed, see "Lens Correction Data" on the next page. Select [Enable], then press the picture. 3 Take The image will be recorded with the peripheral illumination corrected. Correction disabled. 122 Correction enabled. Page 1233 Correcting the Image's Dark Corners Lens Correction Data The camera already contains lens peripheral illumination correction data for approx. Ten image-recording quality settings are provided: 73, 83, 74, 84, 7a, 8a, b, c, 1+73, 1. Select the image-recording quality. Under the [z1] tab, select [Image quality], then press *1*. [Image quality] will appear. Pixels recorded (pixel count) Possible shots image-recording quality. 2 Set Select the image-recording quality, referring to the respective quality's pixel count and number of possible shots displayed on the screen, then press *86*. Page 873 Setting the Image-Recording Quality Guide to Image-Recording Quality Settings (Approx.) Using it with an incompatible battery charger or product may result in malfunction or accidents for which Canon cannot be held liable. 35 Page 36 Installing and Removing the Battery and Card Load a fully charged Battery Pack LP-E10 into the camera. 31, 34 Checking depth of field 197 BULB (bulb exposure) (In the mode, [Ow] (White priority) is set.) 1 Press the button. [White balance] will appear. A white balance setting. 2 Select Press the keys or turn the dial to select the desired setting, then press *1*. The "Approx." If you select [Clear all on card], the printer will be cleared for all the images on the card. Note that RAW images and movies will not be included in the print order even if you set [Byn] or [All images]. When using a PictBridge-compatible printer, do not specify more than 400 images for one print order. If the Eye-Fi card has a write-protect switch set to the LOCK position, you will not be able to check the card's connection status or disable Eye-Fi transmission (p.269). Playback Problems Part of the image blinks in black. It is the highlight alert (p.232). This is to avoid damaging the camera. 25, 36, 52 Card reminder With an external Speedlites, high-speed sync will also be possible. 1: 1/200-1/60 sec. Even if you take the picture in magnified view, the image area for the normal view will be captured. If you use a TS-E lens and shift or tilt the lens or use an Extension Tube, the standard exposure may not be obtained, or the exposure may be irregular. 155 Page 156 General Live View Shooting Cautions Live View image under low- or bright-light conditions, the Live View image may not reflect the brightness of the captured image. Even if a low ISO speed is set, noise may be noticeable in the displayed Live View image under low light. 274 Menu Settings (Mired: Measuring unit indicating the density of a color temperature conversion filter.) 133 Page 134 Adjusting the Color Tone for the Light Source White Auto Bracketing With just one shot, three images with different color tones can be recorded simultaneously. If the error persists, use a different card. If you can transfer all the images on the card to a computer, transfer all the images and then format the card with the camera (p.52). The display may be difficult to see depending on the angle. Lens Mount Maintenance Dust adheres to the image mount, wipe it off with a dry and clean cloth. The image will be displayed onto the LCD monitor at the standard brightness. 129315 Page 316 Index Color tone 70, 125 Continuous file numbering 186 Continuous shooting 100 Contrast 125 Copyright information 188 Creative Auto 63 Creative filters 234M (Creative Zone) icon 8 Creative Zone modes 30 Custom Functions 256 Custom white balance 41 Daylight saving time 110 Dial 26, 105 Digital terminal 240, 313 Direct printing 240 DPOF (Digital Print Order Format) 249 Drive/Self-timer 100, 101 Dust Delete Data 200 Erasing information 228 Error codes 294 Evaluative metering 113 Exposure compensation 114 Exposure level increments 258 External flash 199 Eye-Fi cards 102 Eye-Fi cards 269 Eyepiece cover 33, 1023 FF (Faithful) 0*5" indicates 0.5 sec. Note that the printed image may look slightly different from the displayed image, which is only an approximation. This also applies to [Brightness] and [Adjust levels] on page 246. If you imprint shooting information on an image shot at an expanded ISO speed (H), the correct ISO speed may not be imprinted. 244 Page 245 Printing the date and file number 5 Set Imprinting. Set them if necessary. Select, then press *1*. Set the print settings as desired, then press the number of copies. 6 Set it if necessary. Select, then press *1*. Set the number of copies, then press printing. 7 Start Select [Print], then press. The [Default] setting for printing effects and other options are the printer's own default settings as set by the printer's manufacturer. 214k Playing Back Movies After the manual reset, the file numbering returns to continuous or auto reset. (There will be no manual reset confirmation dialog.) If the file number in folder 999 reappears, shooting will not be possible even if the card still has storage capacity. Set [52: LCD brightness] to 4, and look at the Live View image, preventing the surrounding light from affecting the image viewing. If you do not want the Live View image to be displayed when setting functions, press the button after step 1 and set [Ambience-based shots] and [Effect]. 76 Page 77 Shooting with Ambience Selection Ambience Settings (1) Standard setting Standard image characteristics for the respective shooting mode. Note that there are image characteristics geared for portraits and is geared for landscapes. The movie will still be recorded in the movie-recording size that was set. If you connect the camera to a TV set (p.224) and shoot a movie, the TV set will not output any sound during the shooting. This is effective when you prefer to control the exposure in less fine increments than 1/3-stop increments. When 1 is set, the exposure level will be displayed in the viewfinder and on the LCD monitor as shown below. C.Fn.2150 expansion: Off. On When you set the ISO speed, you will be able to set "H" (equivalent to ISO 12800). Hold the camera steady or use a tripod. When using a zoom lens, use a wide angle to reduce blur caused by camera shake even with handheld shooting. When shooting portraits in low-light conditions, tell the subject to keep still until the picture is taken. The image quality of the Live View image is different from that of the recorded image.) If the light source (illumination) within the image changes, the screen may flicker. 31519 Page 20 Safety Instructions Be sure to read these instructions in order to operate the product safely. Follow these instructions to prevent injury or harm to the operator of the product or others. WARNING: Denotes the risk of serious injury or death. Keep the product out of the reach of young children. A strap wrapped around a person's neck may result in strangulation. The parts or provided items of cameras or accessories are dangerous if swallowed. To start Live View shooting again, press the button again. • Selecting [z3: Dust Delete Data], [52: Clean manually], [53: Clear settings], or [53: Firmware Ver.] • Turning the Mode Dial past 145 Page 146 Using AF to Focus (AF Method) Selecting the AF Method You can select an AF method to suit the shooting conditions and your subject. B is for blue, A for amber, M for magenta, and G for green. 663 Shooting Landscapes 1/60 sec. To set the aperture, hold down the button and turn the dial. The ISO speed will be set automatically within ISO 100 to 6400. You can set the ISO speed manually within ISO 100 - ISO 6400 in whole-stop increments. If [k1: k Highlight tone priority] is set to [Enable], the ISO speed will be ISO 200 - ISO 6400. AE lock and exposure compensation cannot be set. Changing the shutter speed or aperture during movie shooting is not recommended since the changes in the exposure will be recorded. If you change the shutter speed while shooting a movie, under fluorescent or LED lighting, image flicker may be recorded. With ISO Auto, the movie shooting can record a suitable exposure even when the ambient brightness changes. By pressing the button, you can display the histogram. When shooting a movie of a moving subject, a shutter speed of 1/30 sec. to 1/125 sec. is set. 209 Setting Ratings 674 (Close-up) Improper handling of this type of waste could have a possible impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. The function's setting screen will appear. Press the keys or turn the dial to change some of the settings. Also, do not shake the product or expose the product to strong impacts. Do not apply strong pressure on the lens or allow an object to hit it. This may cause injury or damage to the product. Flash emits high temperatures when fired. Select [OK] or Delete without saving the confirmation dialog. to album (Step 5) Playback video snapshot] Operations Function Playback Description 2 Exit The previous screen will reappear. 7 Play By pressing *1*, you can play back or pause the video snapshot recorded immediately before. 5 First frame Displays the first scene of the album's first video snapshot. P Skip backward * Each time you press *1*, the video snapshot skips back by a few seconds. 3 Previous frame Each time you press *1*, the previous frame is displayed. If the icon blinks in the viewfinder, raise the built-in flash. Auto built-in flash : The flash fires automatically whenever necessary. Built-in flash on : The flash fires at all times. Built-in flash off : The flash is disabled. When not using the built-in flash, see thenotes on page 60 for shooting. 65 Page 662 Shooting Portraits The (Portrait) mode blurs the background to make the human subject stand out. 1-sec. 192 Rotation (image) 240, 313 Direct printing 240 Blue, black and white, or sepia. 4 times / 13.1 feet. On When you set the ISO speed, you will be able to set "H" (equivalent to ISO 12800). Hold the camera steady or use a tripod. When using a zoom lens, use a wide angle to reduce blur caused by camera shake even with handheld shooting. When shooting portraits in low-light conditions, tell the subject to keep still until the picture is taken. The image quality of the Live View image is different from that of the recorded image.) If the light source (illumination) within the image changes, the screen may flicker. 31519 Page 20 Safety Instructions Be sure to read these instructions in order to operate the product safely. Follow these instructions to prevent injury or harm to the operator of the product or others. WARNING: Denotes the risk of serious injury or death. Keep the product out of the reach of young children. A strap wrapped around a person's neck may result in strangulation. The parts or provided items of cameras or accessories are dangerous if swallowed. To start Live View shooting again, press the button again. • Selecting [z3: Dust Delete Data], [52: Clean manually], [53: Clear settings], or [53: Firmware Ver.] • Turning the Mode Dial past 145 Page 146 Using AF to Focus (AF Method) Selecting the AF Method You can select an AF method to suit the shooting conditions and your subject. B is for blue, A for amber, M for magenta, and G for green. 663 Shooting Landscapes 1/60 sec. To set the aperture, hold down the button and turn the dial. The ISO speed will be set automatically within ISO 100 to 6400. You can set the ISO speed manually within ISO 100 - ISO 6400 in whole-stop increments. If [k1: k Highlight tone priority] is set to [Enable], the ISO speed will be ISO 200 - ISO 6400. AE lock and exposure compensation cannot be set. Changing the shutter speed or aperture during movie shooting is not recommended since the changes in the exposure will be recorded. If you change the shutter speed while shooting a movie, under fluorescent or LED lighting, image flicker may be recorded. With ISO Auto, the movie shooting can record a suitable exposure even when the ambient brightness changes. By pressing the button, you can display the histogram. When shooting a movie of a moving subject, a shutter speed of 1/30 sec. to 1/125 sec. is set. 209 Setting Ratings 674 (Close-up) Improper handling of this type of waste could have a possible impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. The function's setting screen will appear. Press the keys or turn the dial to change some of the settings. Also, do not shake the product or expose the product to strong impacts. Do not apply strong pressure on the lens or allow an object to hit it. This may cause injury or damage to the product. Flash emits high temperatures when fired. Select [OK] or Delete without saving the confirmation dialog. to album (Step 5) Playback video snapshot] Operations Function Playback Description 2 Exit The previous screen will reappear. 7 Play By pressing *1*, you can play back or pause the video snapshot recorded immediately before. 5 First frame Displays the first scene of the album's first video snapshot. P Skip backward * Each time you press *1*, the video snapshot skips back by a few seconds. 3 Previous frame Each time you press *1*, the previous frame is displayed. If the icon blinks in the viewfinder, raise the built-in flash. Auto built-in flash : The flash fires automatically whenever necessary. Built-in flash on : The flash fires at all times. Built-in flash off : The flash is disabled. When not using the built-in flash, see thenotes on page 60 for shooting. 65 Page 662 Shooting Portraits The (Portrait) mode blurs the background to make the human subject stand out. 1-sec. 192 Rotation (image) 240, 313 Direct printing 240 Blue, black and white, or sepia. 4 times / 13.1 feet. The flash fired and the picture came out extremely bright. Move further away from the subject and shoot. 10 seconds after you press the shutter button, the number of multiple shots will be taken. When using the self-timer, see thenotes on page 101 for shooting. (4) Built-in flash firing: Press and set the shutter speed dial. The dynamic range is expanded from the standard 18% gray to bright highlights, to 1/500 sec. according to the speed of the moving subject. To blur a running child or animal and convey an impression of motion Use a medium shutter speed such as 1/250 sec. (They cannot be set individually for each image.) Setting the Printing Options Select [Print order]. Under the [x1] tab, select [Printer], then press *1*. 2 Select Select [Set up], then press *1*. The option as desired. 3 Set Set the [Print type], [Date], and [File No.]. Select the option to be set, then press *1*. you can set the functions in the table below. A subject in the shade will look more calm and impressive. 77 Page 78 Shooting with Ambience Selection (7) Brighter The picture will look brighter. (8) Darker The picture will look darker. (9) Monochrome The picture will be monochrome. 54 Feature Guide If the image is cropped, the print may look grainier due to the fewer number of pixels. 243 Page 244w Printing the printing effects (image 4 Setup). Set them if necessary. comp and [E-TTL II meter]. can be set for [External flash function]. 258C.Fn.I: Exposure If there are too many pixels on the left, the respective color information will be lacking. Attach the battery to the charger again and wait a while before reconnecting the charger to a power outlet again. 20 lenses. Look at the peak hold indicator, and adjust so that the level meter sometimes lights up on the right of the "12" (-12 dB) mark for the loudest sounds. The default settings are the same as the mode. * CA stands for Creative Auto. 1 Set the Mode Dial to the button (7.2) Press The Quick Control screen will appear the desired function. 3 Set Press the cross keys to select a function. The settings of the selected function and Feature guide (p.55) will appear. Set the number of copies, then press printing. 7 Start Select [Print], then press. The [Default] setting for printing effects and other options are the printer's own default settings as set by the printer's manufacturer. 214k Playing Back Movies After the manual reset, the file numbering returns to continuous or auto reset. (There will be no manual reset confirmation dialog.) If the file number in folder 999 reappears, shooting will not be possible even if the card still has storage capacity. Set [52: LCD brightness] to 4, and look at the Live View image, preventing the surrounding light from affecting the image viewing. If you do not want the Live View image to be displayed when setting functions, press the button after step 1

More than with [Quick mode]. Even focus is achieved, pressing the shutter button halfway focus again. You cannot focus on a moving subject continuously. The image brightness may change during and after the AF operation. If the light source changes while the Live View image is displayed, the screen may flicker and focusing may be difficult. Black in high temperatures. 15 min. Press the keys or turn the dial to select the ambient. Although AF is possible with the Live View image displayed, the AF operation will take longer than with the Quick mode. 28 Firmware The camera is not equipped with a speaker. 150 Page 159k Shooting Movies General Movie Shooting Cautions are on pages 179-180. If necessary, also read General Live View Shooting Cautions on pages 155-156. The ISO speed (ISO 100 - ISO 6400), shutter speed, and aperture are set automatically. You can press the button (p.118) to lock the exposure (AE lock). The exposure setting will be displayed for the number of seconds set with [k2: Metering timer]. Internet connection is required to download and install the software. If you are too close to the subject, the focus indicator will blink. If you use flash and the bottom part of the picture comes out unnaturally dark, move away from the subject and try again. With a zoom lens, use the telephoto end. If you have a zoom lens, using the telephoto end will make the subject look larger. If you raise the built-in flash beforehand, it will fire automatically as necessary. 68 Page 695 Shooting Moving Subjects Use the (Sports) mode to shoot a moving subject, such as a running person or a moving vehicle. Shooting Tips Use a telephoto lens. The use of a telephoto lens is recommended for shooting from a distance. Use the center AF point to focus. Aim the center AF point over the subject, then press the shutter button halfway to autofocus. During autofocus, if the subject moves away from the center AF point, focus tracking continues as long as the subject is covered by another AF point. With AI Servo AF, the beeper will not sound even when focus is achieved. Also, the focus indicator in the viewfinder will not light up. AI Focus AF for Switching the AF Operation Automatically AI Focus AF switches the AF operation from One-Shot AF to AI Servo AF automatically if a still subject starts moving. After the subject is focused in One-Shot AF, if the subject starts moving, the camera will detect the movement, change the AF operation automatically to AI Servo AF, and start tracking the moving subject. When focus is achieved in the AI Focus AF operation with the Servo mode active, the beeper will sound softly. Normally, [Default setting] is adequate, but if the settings match the lighting condition or scene, the picture will look more accurate to your eyes. For Live View shooting, if you set both [Light/scene-based shots] and [Ambience-based shots] (p.75), you should first set [Light/scene-based shots]. This camera is a Type-A camera. Canon Speedlites other than the EX-series will not fire. If the camera is used with a flash unit or flash accessory dedicated to another camera brand, not only will the camera not operate as usual but it may also result in a malfunction. The flash fires only once even when MULTI flash is set with the Speedlite. When using an external Speedlite, attach it after retracting the built-in flash. With an EX-series Speedlite not compatible with flash function settings (p.197), only [Flash exp. When [ON] is set, the red eye will be corrected for printing. The [kBrightener] and [Red-eye corr.] effects will not be reflected on the screen. When [Detail set.] is selected, you can adjust the [Contrast], [Saturation], [Color tone], and [Color balance]. You can change the black-and-white effect by adjusting the contrast. W Soft focus Gives the image a soft look. Also, changes in the exposure (brightness) or color tone may be recorded. Setting [With Built-in flash func. 9 Contents at a Glance If the power is turned off, the shutter will close and the shutter curtains or reflex mirror may get damaged. Never use pressurized air or gas to clean the sensor. When this is combined with a slow shutter speed, you can create a trail of light such as from car headlights at night with a more natural feel. The image looks softer. If the vertical image is taken while the camera is pointed up or down, the image may not be rotated automatically for playback. [Delete item/items] deletes one item at a time, and [Delete all items] deletes all registered items. Display from My Menu When [Enable] is set, the [9] tab will be displayed first when you display the menu screen. 265 Page 266 266 Page 267 12 Reference This chapter provides reference information for camera features, system accessories, etc. Certification Logo Under the [53] tab, if you select [Certification Logo Display] and press , some of the logos of the camera's certifications will appear. Doing so may damage the image sensor or the camera's internal components. Since long bulb exposures produce more noise than usual, the image may look slightly grainy. You can reduce the noise due to long exposures by setting [4: Long exposure reduction] under [53: Custom Functions (C.Fn)] to [1: Auto] or [2: On] (p.260). If ISO Auto is set for a bulb exposure, the ISO speed will be fixed at ISO 800 (p.92). For bulb exposures, it is recommended to fix the camera to a tripod and shoot remotely with a smartphone. After setting the flash output for the appropriate subject brightness, you can recompose (put the subject toward the side) and shoot. To return to the single-image display, press the button. Press the button to save the print order to the card. Quantity Total images selected Checkmark Index icon [Standard] [Both] Press the keys to set the number of copies to be printed for the displayed image. [Index] Press the keys to add a checkmark to the box . For stubborn dirt, take the camera to the nearest Canon Service Center. Do not touch the camera's electrical contacts with your fingers. 122 Lighting/scene-based shots There are two ways to do this. 1. Install the software (p.311). 2. Use an interface cable (sold separately) to connect the camera to the computer. Connect the cable to the camera's digital terminal with the cable plug's icon facing the front of the camera. Connect the cord's plug to the computer's USB terminal. 3. Use EOS Utility to download the images. Refer to the EOS Utility Instruction Manual. Downloading Images to a Computer Downloading by Connecting the Camera to the Computer [53: Wi-Fi] is set to [Enable], the camera cannot be connected to a computer. To cancel, press the button, the setting. 3 Exit Press the < > button to exit the Quick Control. 212 Page 213 Quick Control for Playback To rotate an image, set [51: Auto rotate] to [On]. 5 Troubleshooting Also, the continuous shooting speed may be slower. If you play back or directly print a 1 or 1+73 image with the camera, the high ISO speed noise reduction effect may become smaller. Check the noise reduction effect or print noise-reduced images with Digital Photo Professional (EOS software, p.310). If you send RAW images to a smartphone, the high ISO speed noise reduction effect of saved images on the smartphone may become smaller. The default setting is [Enable]. 108M (Manual exposure) The 9 (frame rate) switches automatically depending on the [k2: Video system setting, Image Size] (1920x1080) (A) : Full-Definition (Full HD) recording quality. The aspect ratio is 16:9. [1280x720] (B) : High-Definition (HD) recording quality. At low ISO speeds, the noise in the darker parts of the image (shadow areas) is further reduced. This is useful when you want to save images numbered anywhere between 0001 to 9999 on multiple cards or in multiple folders or in multiple folders into one folder on a computer. If the replacement card or existing folder already contains images recorded previously, the file numbering of the new images may continue from the file numbering of the existing images on the card or in the folder. Press the shutter button halfway to execute AF. Press the button for AE lock. AE lock/AF: Press the shutter button halfway for AE lock. This more effectively prevents subject blur and camera shake than [1: 1/200-1/60sec.auto]. Then press . The following AF methods are provided: [FlexiZone - Single], [u Live mode] (face detection, p.147), and [Quick mode] (p.152). If you want to achieve precise focus, set the lens's focus mode switch to, magnify the image, and focus manually (p.154). Select the AF method. Under the [z4] tab, select [AF method]. (Including battery and card) Approx. White balance bracketing is possible up to ±3 levels in single-level increments. Set the white balance bracketing amount. B/A bias ±3 levels in step 2 for "White Balance Correction", when you turn the dial, the " " mark on the screen will change to "" (3 points). Turning the dial to the right sets the B/A bracketing, and turning it to the left sets the M/G bracketing. On the right, "Bracket" indicates the bracketing direction and correction amount. Pressing the button will cancel all the [WB Shift/Bkt.] settings. Press to exit the setting and return to the menu. Bracketing Sequence The images will be bracketed in the following sequence: 1. 168 Viewing on a TV set 263 Registering My Menu 180 shots Approx. To make small things appear much larger, use a macro lens (sold separately). Shooting Tips Use a simple background. A simple background makes small objects such as flowers stand out better. Move in as close as possible to the subject. Check the lens for its minimum focusing distance. If [Hold] is set, the image review will be displayed up until the [51: Auto power off] time has elapsed. During image review, if you operate any camera controls such as pressing the shutter button halfway, the image review will end. Under the [z1] tab, select [Image review], then press . 273 Page 531 7 Index Recombosing 61 Focusing point (AF point) 97 Folder creation/selection 184 Food 70 Formatting (card initialization) 52 Frame rate 165, 214 Fully automatic shooting (Scene Intelligent Auto) 58 Functions settable by shooting mode 272 Grainy B/W 236 Grid display 143, 177 HD/ML 214, 224 High ISO speed noise reduction 261 High-Definition (HD) movies 166 Highlight alert 232 Highlight tone priority 175, 261 Histogram (Brightness/RGB) 232 Hot shoe 261 ICC profile 135 Image dust prevention 200, 202 Image review time 30 Image-recording quality 86 Images Auto playback 220 Auto rotation 190 Erasing 228 Highlight alert 232 Histogram 232 Image characteristics (Picture Style) 93, 124, 127 Index display 182 Image Zone You can also use this software to set various camera settings and shoot remotely from the computer connected to the camera. The card may then return to normal. Do not touch the card's contacts with your fingers or metal objects. When indoors or in low-light conditions, raise the built-in flash. Change the program using Program shift. After pressing the shutter button halfway, turn the dial to change the shutter speed and aperture setting combination (program). If the subject looks dark, move nearer and shoot again. Also shoot with the (Scene Intelligent Auto) mode. Since camera shake is prone to occur with night shots, shooting in the mode is recommended. 71 Page 726 Shooting Night Portraits During Live View shooting, it may be difficult to focus on dots of light such as in a night scene. In step 4 on page 234, if you press the button, you can switch between the white frame's vertical and horizontal orientations. 236 Page 237S Resizing JPEG Images You can resize a JPEG image to make the pixel count lower and save it as a new image. / 30 sec. The icon will disappear. To protect another image, repeat step 3. To return to the menu, press the button. Page 227K Protecting Images 3 Protecting All Images in a Folder or on a Card You can protect all the images in a folder or on a card at one time. When you select [All images in folder] or [All images on card] in [k1: Protect images], all the images in the folder or on the card will be protected. To cancel the image protection, select [Unprotect all images in folder] or [Unprotect all images on card]. If you format the card (p.52), the protected images will also be erased. Movies can also be protected. Once an image is protected, it cannot be erased by the camera's erase function. Also, the exposure or color tone may not come out right. Exit Live View shooting and wait a few minutes before shooting again. White and Red Internal Temperature Warning Icons If the camera's internal temperature increases due to prolonged Live View shooting or under a high ambient temperature, a white or red icon will appear. The white icon indicates that the image quality of still photos will deteriorate. After fixing the problem, resume printing. The Picture Style selection screen will reappear. Any parameter settings different from the default will be displayed in blue. By selecting [Default set.] in step 3, you can revert the parameter settings of the respective Picture Style to their defaults. To shoot with the Picture Style you adjusted, follow step 2 on page 93 to select the adjusted Picture Style, then shoot. 124 Page 125A Customizing Image Characteristics N Parameter Settings and Effects Sharpness Adjusts the sharpness of the subject. To make it less sharp, set it toward the E end. 162 Manual exposure shooting (If C.Fn-9 is set, hold down the button and press .) The image. 3 Magnify Press the button. The area within the magnifying frame will be magnified. Each time you press the button, the magnification of the image will change in the following sequence: 5x 9 10x 9 Normal view manually. 4 Focus While looking at the magnified image, AE lock Magnified area position Magnification turn the lens focusing ring to focus. After achieving focus, press the button to return to the normal view. The picture. 5 Take Check the focus and exposure, then press the shutter button to take the picture (p.138). 154 Page 155 General Live View Shooting Cautions Image Quality When you shoot at high ISO speeds, noise (such as dots of light and banding) may become noticeable. Shooting in high temperatures may cause noise and irregular colors in the image. If Live View shooting is used continuously for a prolonged period, the camera's internal temperature may rise, and image quality may deteriorate.
